

# What is NetView?

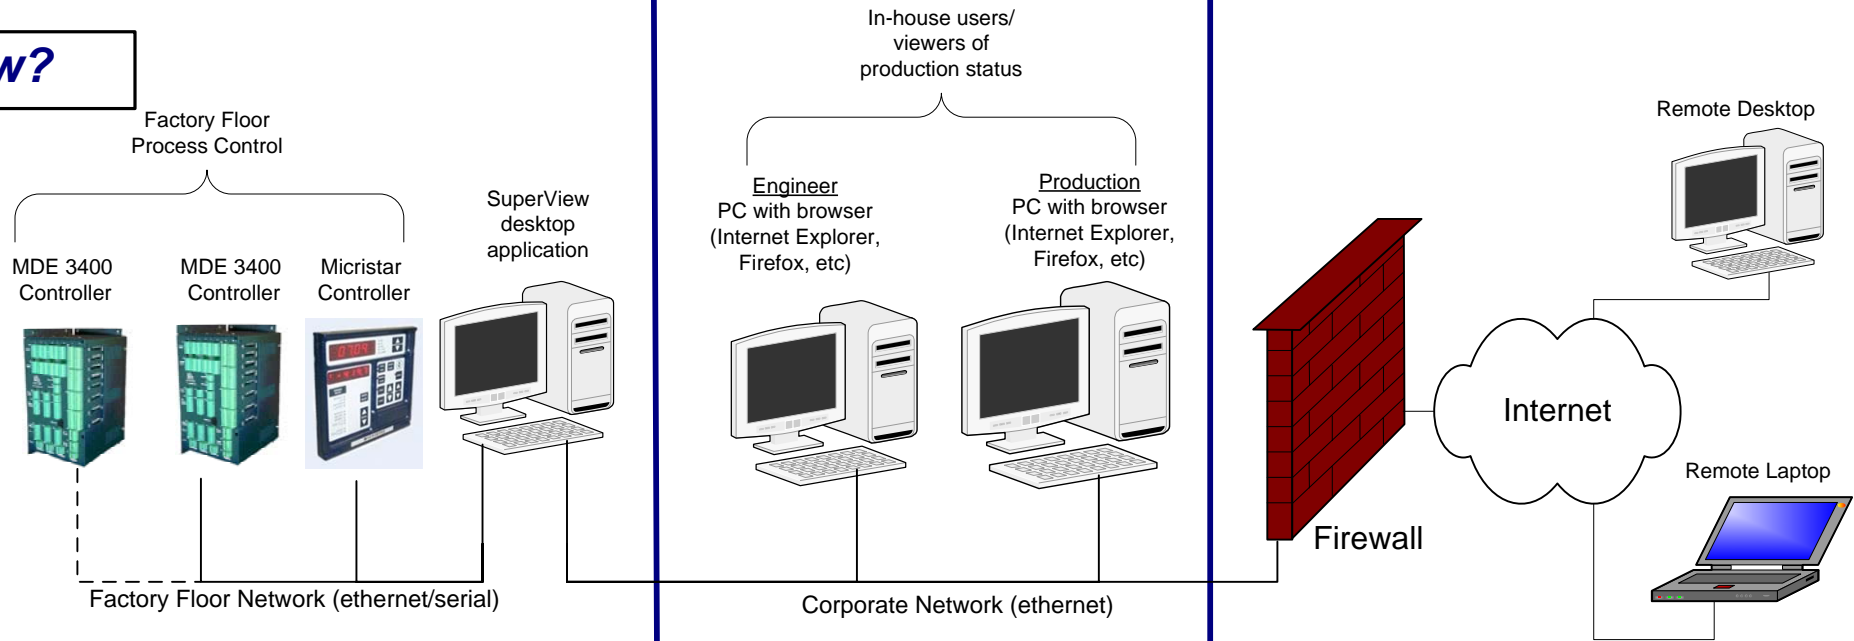

## Where?

### Factory Floor

### Corporate Offices

### Off-site Users

## How?

## What?

### SuperView:

- Controller management
- Data logging & recipe building
- Graphs
- Generates & delivers real-time NetView web pages

### NetView:

- Looking at the web pages (generated by SuperView on the factory floor) in any browser (i.e. Internet Explorer, Firefox, etc)
- Watching real-time production processes, including graphs, data logging and recipe progress.
- No need to refresh the pages or data, everything is **real-time!**

### NetView from a Remote Site:

- All data is encrypted with secure access
- Monitoring the same production processes with the flexibility of viewing the real-time data: while traveling, or working at home, or at another corporate office or location
